

How to retrieve and save footage from the Dahua DMSS App

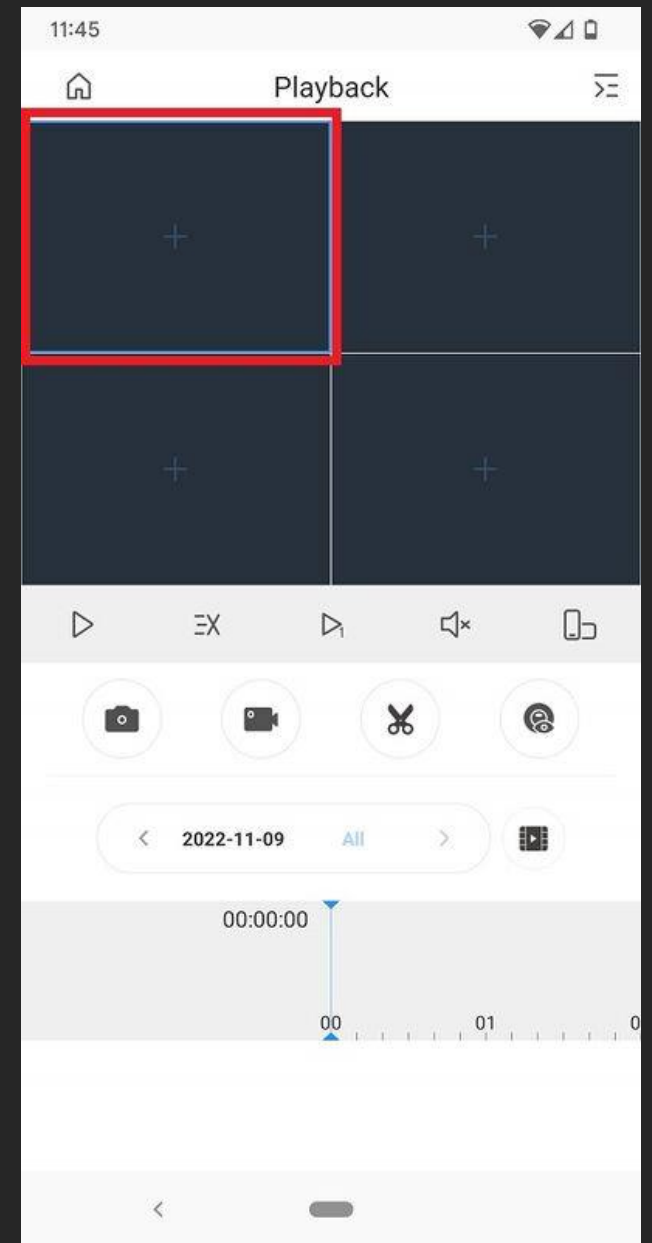

From Playback

- From the Device screen of DMSS, tap on Playback

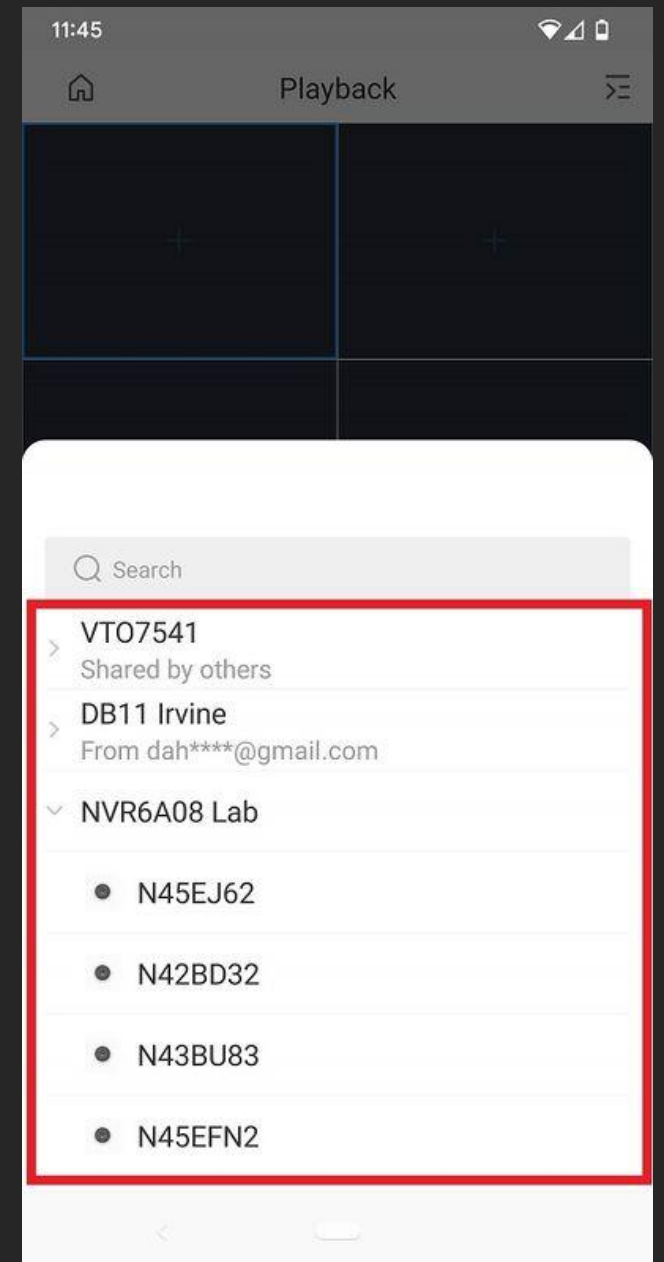

From Playback

- Tap on one of the empty video channels

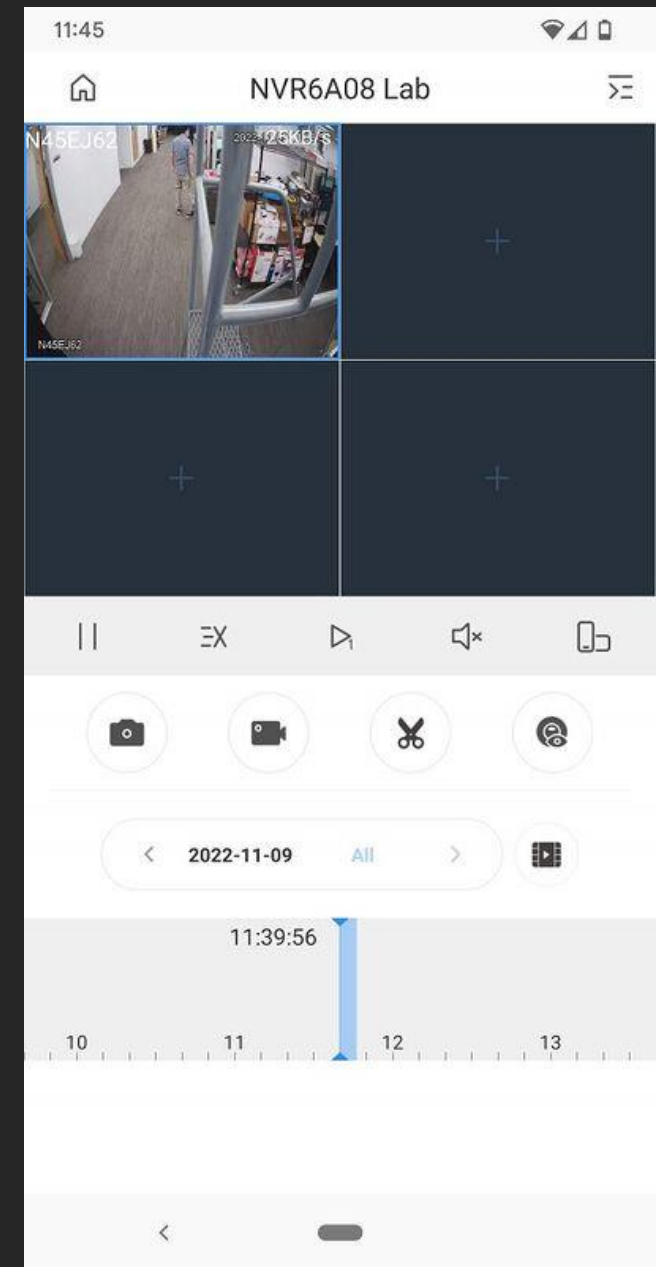

From Playback

- Select a single channel from the list

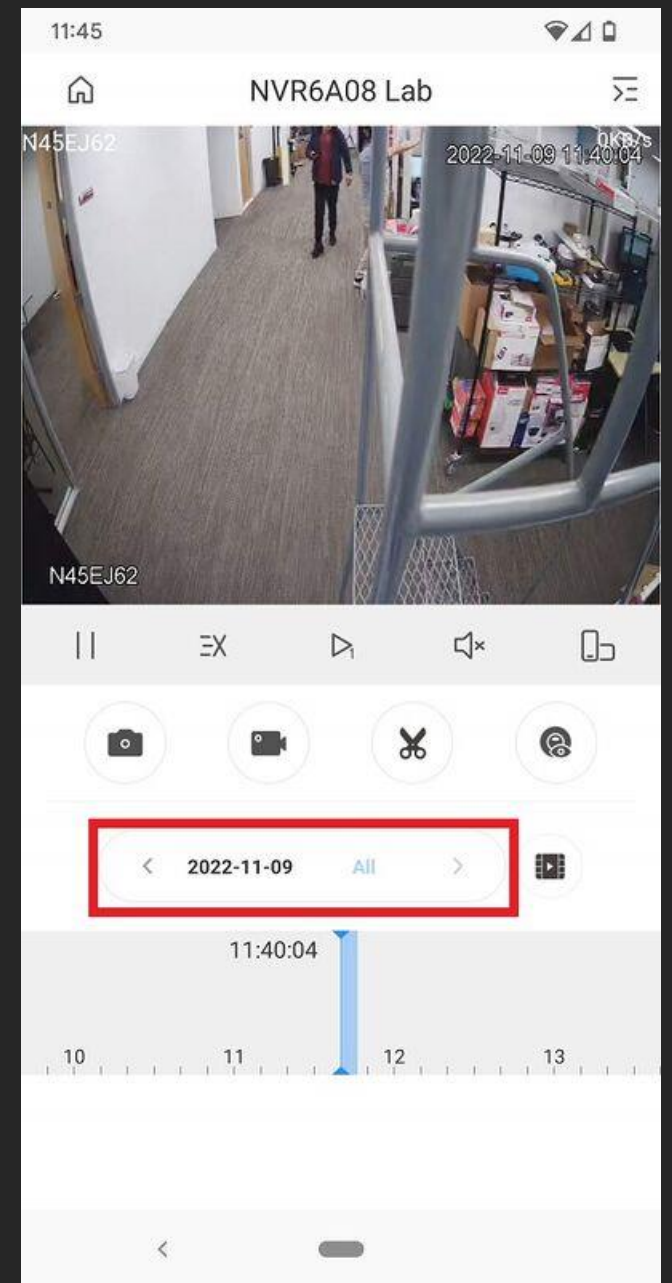

From Playback

- The app will start playing back footage for that channel from today. You can move the timeline around at the bottom to adjust the playback time

From Playback

- To choose the exact day and footage type, tap on the button with the date above the timeline

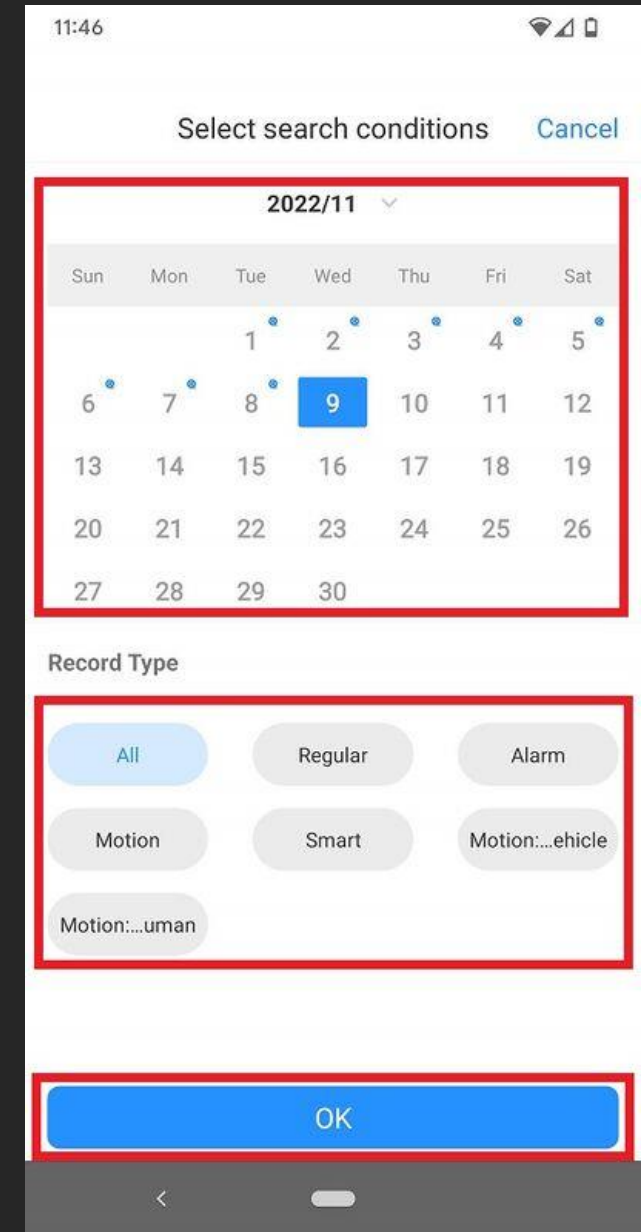

From Playback

- Using the calendar at the top, select the day you want. (Any day with the Playback icon has recorded footage.)

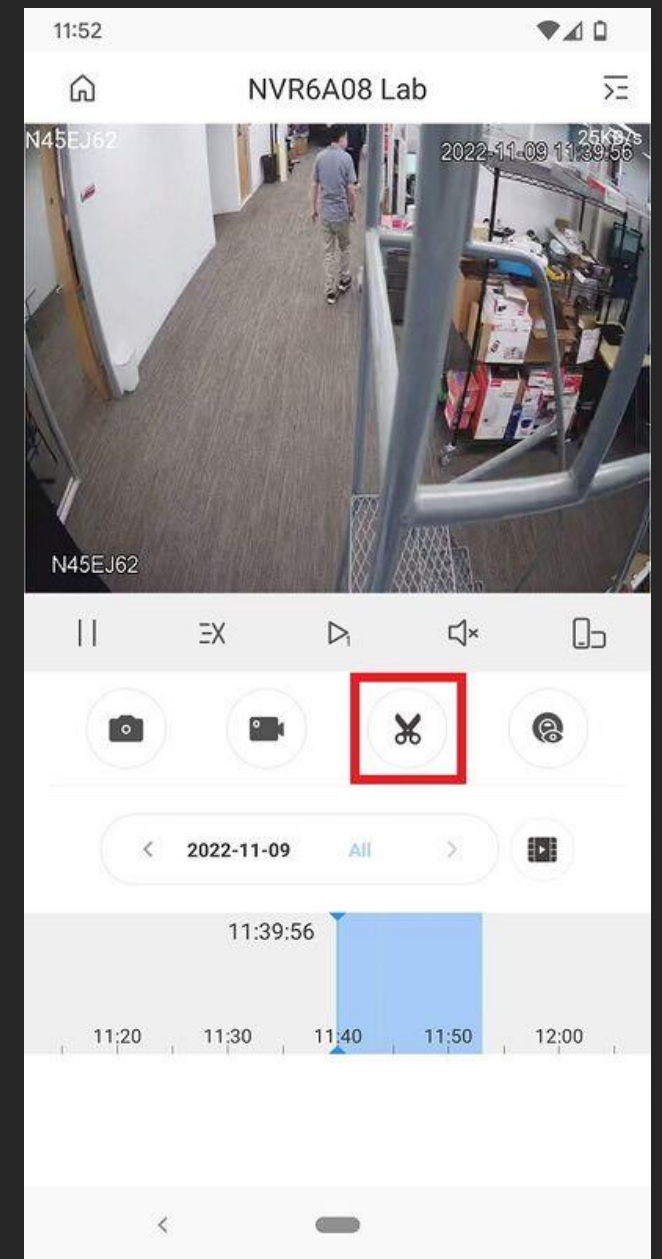

Then tap on the type of footage you want in the section under "Record Type".

Tap on "OK" at the bottom to pull up the recorded footage

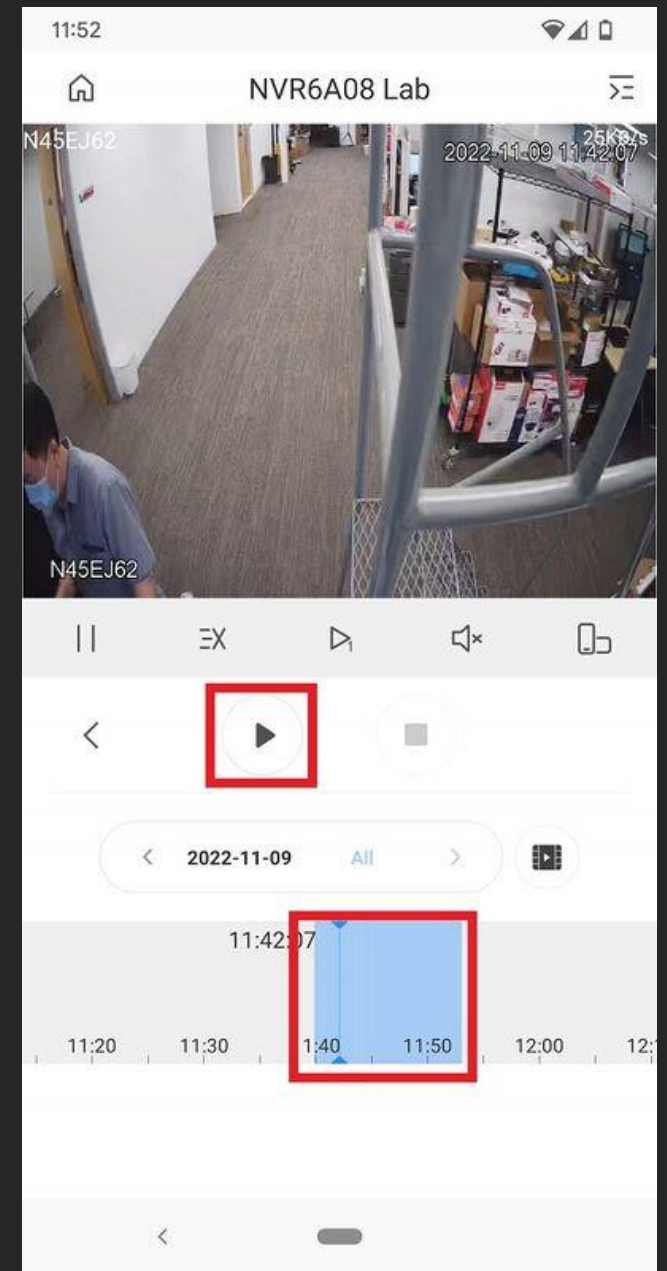

To Save the Footage

- The app will start playing back footage for that channel from today.
Tap on the Scissors icon

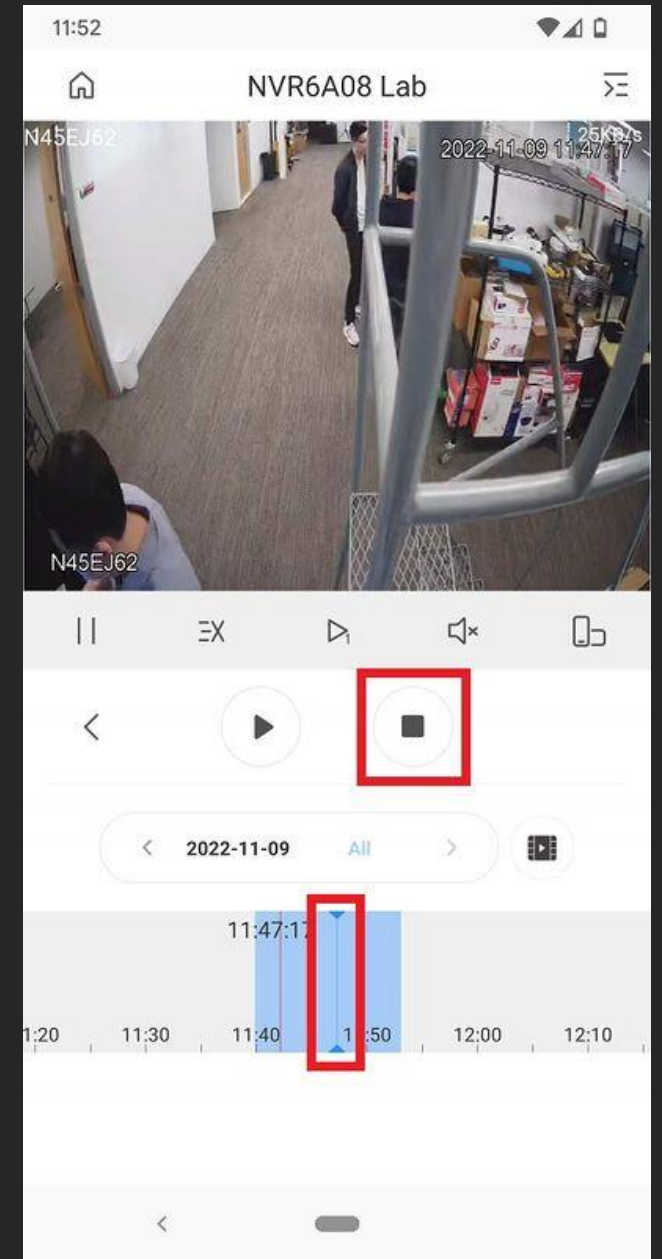

To Save the Footage

- Move the slider on the timeline to the where you want the beginning of the clip to be.
Then tap on the Play icon

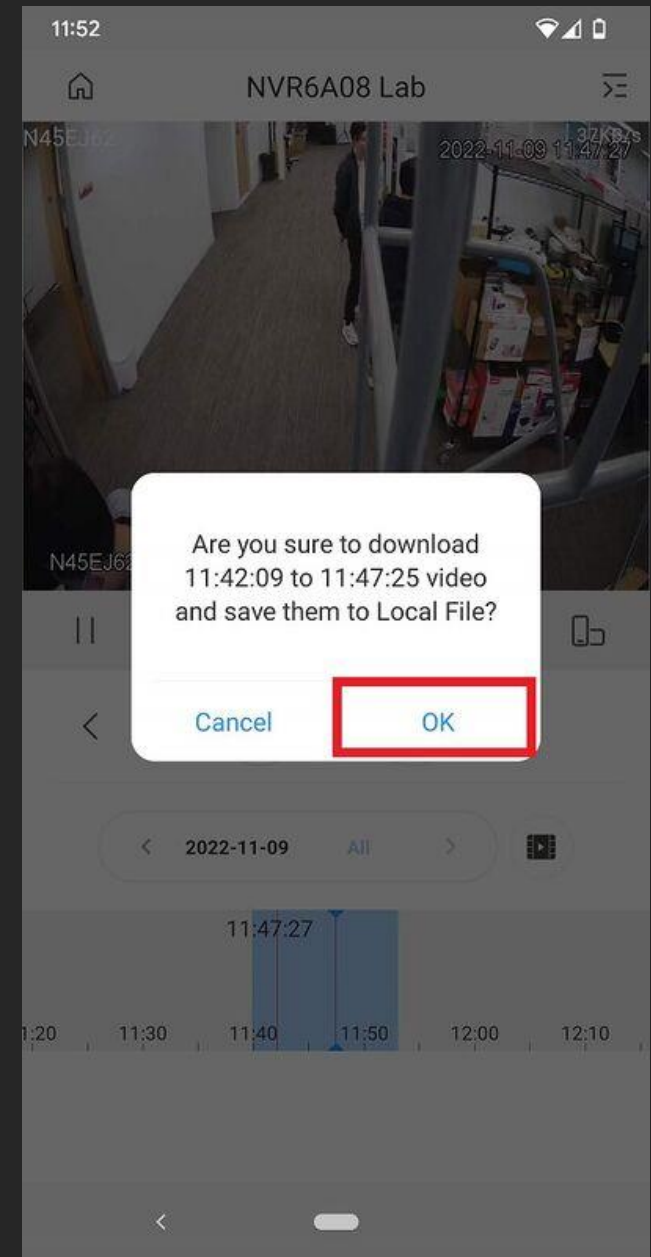

To Save the Footage

- Move the slider on the timeline to the where you want the end of the clip to be.
Then tap on the Stop icon

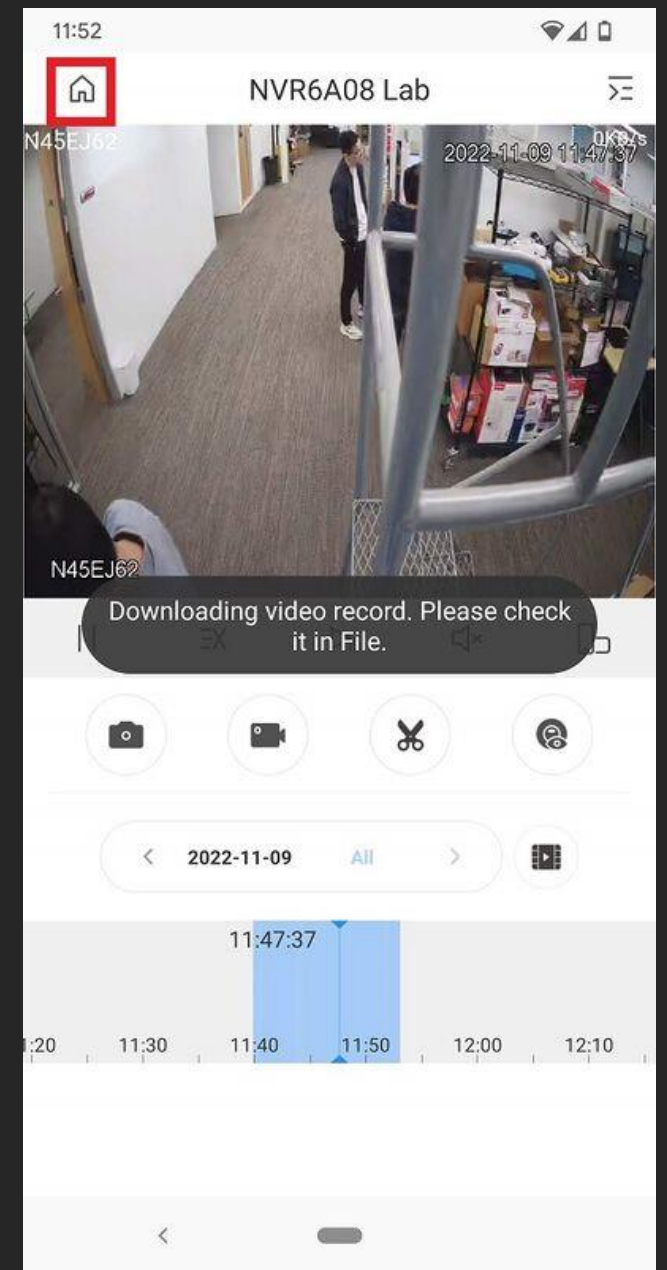

To Save the Footage

- It will ask if you are sure you want to save the video clip.
Tap on **OK**

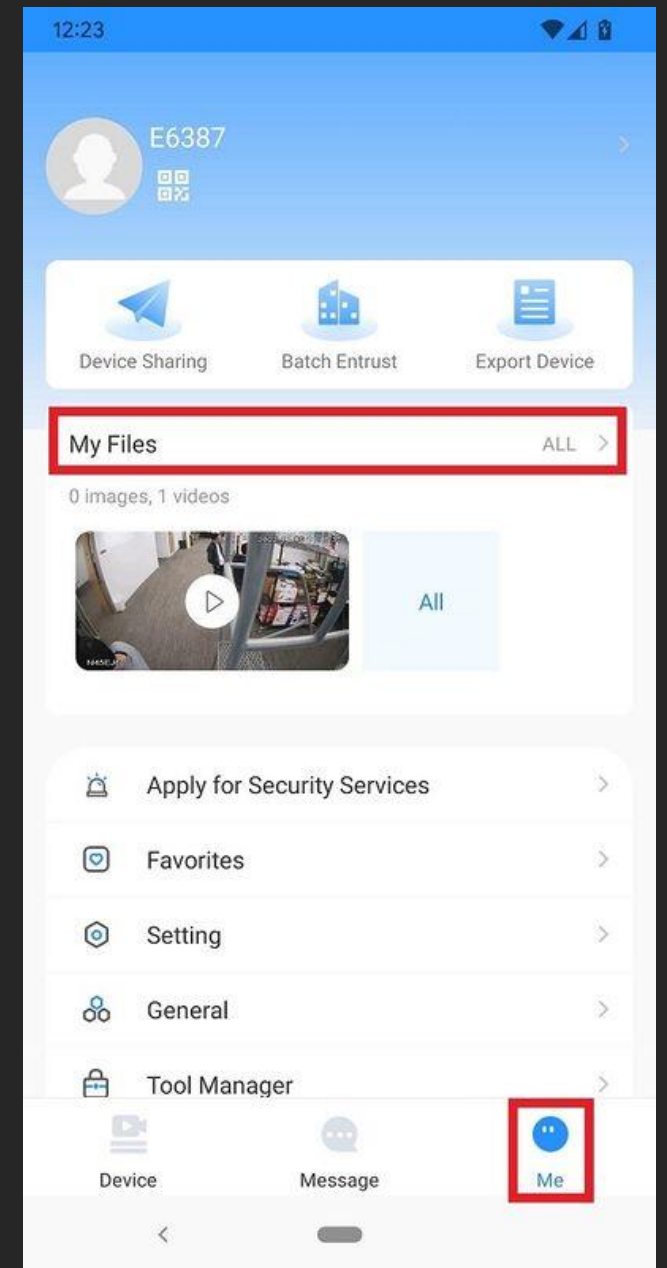

To Save the Footage

- Once it says, "Downloading video record", tap on the Home icon at the top

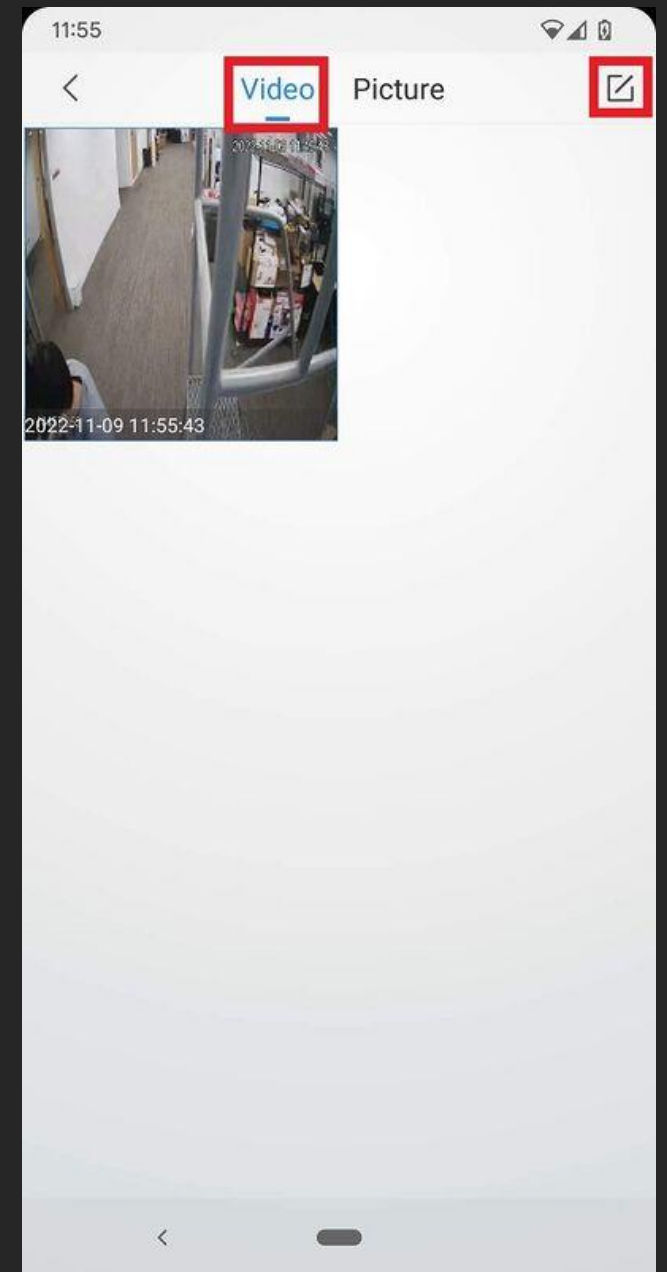

To Save the Footage

- Tap on **Me** at the bottom.
Then tap on **My Files**

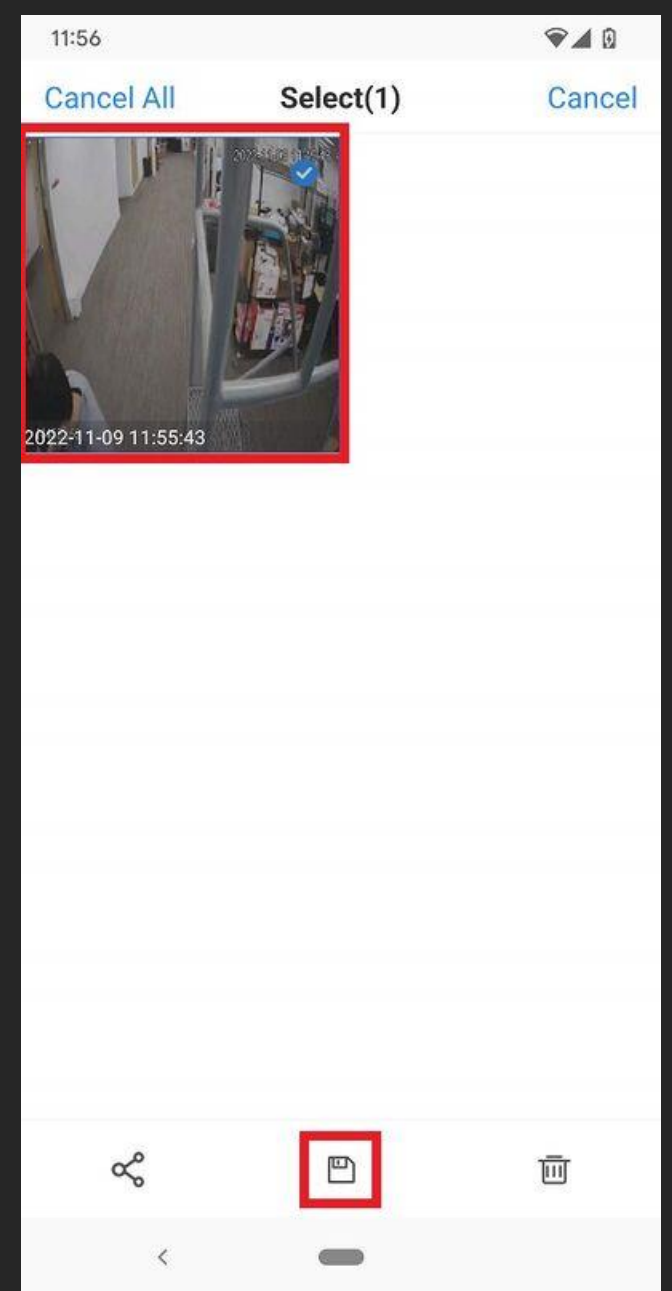

To Save the Footage

- Tap on **Video** at the top.
Then tap on the Edit icon

To Save the Footage

- Select the video clip you just added.
Then tap on the Save icon at the bottom, and choose where to save the video file on your mobile device
